CLINICAL SUMMARY

Primary Pattern
with Rapid weight loss
Current Activity
~50-100 strands (Noticeable) with patient-specific contributors.

Clinical Conclusion
Your assessment suggests hair changes over 1-3 months. The doctor-reviewed plan prioritises rapid weight loss, then supports scalp stability, follicle nutrition and consistent recovery monitoring.

TOPICAL & SCALP CARE PLAN

Minoxidil 5%

Minoxidil 5%

For pattern thinning and responsive scalp areas
Use: Apply once daily as prescribed. Massage gently. Do not rinse.

Finasteride
0.1% Gel

Finasteride 0.1% Gel

For pattern sensitivity if the doctor confirms
Use: Use only as prescribed after doctor review and tolerance check.

Minoxidil or prescription changes should be reconsidered only after scalp barrier and dandruff are controlled.

YOUR RECOVERY TIMELINE (DAY BASED)

1

Day 0-30
Calm the scalp and stabilise triggers
Reduction in active hair fall Improvement in scalp health and comfort.
Consistency is the key early signal.

2

Day 30-60
Reduce shedding and rebuild support
Early signs of follicular recovery Improvement in hair caliber (thickness).
Nutrition and topical rhythm continue.

3

Day 60-120
Early follicular recovery
Visible improvement in hair volume and density Reduced scalp show-through.
Early signs may appear gradually.

4

Beyond Day 120
Visible improvement and consolidation
Further improvement in density and coverage Consolidation of improvement.
Individual response varies.

LIFESTYLE & DAILY SUPPORT

WHAT SUPPORTS RECOVERY

- ✓

Iron-rich nutrition
- ✓

Adequate protein
- ✓

Hydration
- ✓

Consistent sleep
- ✓

Regular movement
- ✓

Scalp care
- ✓

Medical follow-up

WHAT MAY SLOW RECOVERY

- ✗

Smoking or vaping
- ✗

Untreated heavy bleeding
- ✗

Uncontrolled dandruff
- ✗

Extreme dieting
- ✗

Harsh chemical treatment
- ✗

Excessive heat styling
- ✗

Inconsistent treatment use
