CLINICAL SYNOPSIS

Based on the information you shared with us, here is what stands out from your hair story. You have been noticing increased shedding alongside scalp changes that have not

🎯

GOAL

Reduce hair fall and improve quality & growth

Generated 07 Jul 2026

📋

CLINICAL SNAPSHOT

🕒

DURATION

6–12 months

💧

SHEDDING

~50–100 strands (Noticeable)

📅

PATTERN

Hair on pillow / floor / shower

🧴

SCALP

Dandruff + Itching + White flakes,

💊

HORMONAL/BLOOD-LOSS

Heavy bleeding periods, Pre diabet

📈

METABOLIC

🥗

DIET

Vegetarian

🎯

GOAL

Reduce hair fall and improve quali

CONDITION TO KIT MAPPING

Patient driver to selected kit to therapeutic focus

DRIVER	SELECTED KIT	LINKED CONDITIONS	THERAPEUTIC FOCUS
🧠 Metabolic dysfunction Disrupted insulin / AMPK signalling reduces follicular energy supply.		Iron Up Gold (Iron Homeostasis & Hair Recovery) Obesity / Sedentary / St Pre diabetes	Iron store restoration → replenishes depleted reserves Follicular metabolic support → supports iron-dependent Oxygen transport & cellular energy → enhances haemoglo Iron utilisation optimisation → supports absorption,
🧠 Chronic stress HPA-axis activation accelerates anagen-to-telogen transition.		Inflammation Control Chronic stress Oxidative stress	Cytokine suppression → reduces follicular stress Immune modulation → restores balanced immune response Androgen sensitivity control → limits inflammation-dri Oxidative protection → prevents cellular damage
🧠 Metabolic dysfunction Disrupted insulin / AMPK signalling reduces follicular energy supply.		Pro Fact Meta B — Cyclical Metabolic Reset Metabolic dysfunction	Weight & adipose-tissue management → reduces BMI, Hair & skin protection → DHT modulation, follicular Mood & cortisol regulation → adaptogenic and circadian Hormone rebalancing → insulin sensitisation and
🧠 Chronic stress HPA-axis activation accelerates anagen-to-telogen transition.		Pro-Immune Restoration Follicular recovery consol	Immune modulation → strengthens innate and adaptive Inflammation control → reduces cytokine-driven Oxidative stress reduction → protects follicles and Stress & sleep regulation → normalises cortisol and
🧠 Genetic predisposition Inherited follicle sensitivity sets the Bas for therapeutic response.		Female Pattern Hair Loss (FPHL) Pattern Genetic predisposition	Androgen regulation → reduces DHT impact on follicles Follicle rejuvenation → supports stronger, thicker Inflammation control → protects follicles from damage

🌿

TOPICAL PLAN

F-Emugrow MCRD

Apply to the affected scalp area as directed by the doctor. Massage gently for

F-Biwash+ Anti-Dandruff Shampoo

Use 2–3 times per week on wash days. Apply to wet scalp, lather gently for 3–5

🗓️

RECOVERY JOURNEY

🕒

Day 0-30

Reduction in active hair fall

Improvement in scalp health and comfort

Better hair

🕒

Day 30-60

Early signs of follicular recovery

Improvement in hair caliber (thickness)

Appearance

🕒

Day 60-120

Visible improvement in hair volume and density

Reduced scalp show-through in

🕒

Beyond Day 120

Further improvement in density and coverage

Consolidation of improvement observed

🌿

LIFESTYLE AND REVIEW

Metabolic dysfunction

Low-glycaemic plate (50% non-starchy vegetables, 25% lean protein, 25% slow

Chronic stress

Daily 10-minute breathwork or guided meditation; fixed wake/sleep window; one
