CLINICAL SUMMARY

Based on the information you shared with us, here is what stands out from your hair story. You have been noticing increased shedding alongside scalp changes that have no...

Hair grows in cycles, and that rhythm depends on healthy systems working together — your hormones, your nutrition, your gut, your immunity, the scalp itself. When even one of those systems is disturbed, the follicle spends less time in active growth and more time shedding or resting. Looking at what you shared, here i...

- Stress releases cortisol which causes hair loss through substance "P", neuroendocrine mediators, raised metab...
- Hair loss is confirmed to be polygenic and multifactorial, not caused by a single gene but a set of genes whi...
- Heavy menstrual bleeding causes ongoing iron and ferritin depletion. Low iron stores directly arrest the hair...

Pro-Immune Restoration

This kit is formulated to build immunity, repair cellular damage from altered imm...

RECOVERY TIMELINE

- Day 0-30

Stabilise scalp comfort and internal support.
Reduction in active hair fall - Improvement in scalp health and comfort
- Day 30-60

Shedding may begin to settle in responsive areas.
Early signs of follicular recovery - Improvement in hair caliber (thickness)
- Day 60-120

Strength and coverage may begin to improve.
Visible improvement in hair volume and density - Reduced scalp show-through in responsive areas
- Beyond Day 120

Consolidation, maintenance and next review.
Further improvement in density and coverage - Consolidation of improvement observed

LIFESTYLE SUPPORT

- Metabolic dysfunction

Low-glycaemic plate (50% non-starchy vegetables, 25% lean protein, 25% slow carbs); 30 minu...
- Chronic stress

Daily 10-minute breathwork or guided meditation; fixed wake/sleep window; one no-screen hou...
- Oxidative stress

Polyphenol-rich foods daily (berries, green tea, olive oil, dark greens); eliminate smoking...

DRIVER TO KIT MAPPING

PRIMARY

Genetic predisposition
Inherited follicle sensitivity sets the floor for therapeutic response.

â†’

Female Pattern Hair Loss (FPHL) — Pattern Hair Loss Protocol + Iron Up Gold (Iron Homeostasis & Hair Recovery) + Pro-Immune Restoration

Genetic predisposition

Follicular recovery consolidation

Androgen regulation → reduces DHT impact on follicles
Follicle rejuvenation → supports stronger, th...

SECONDARY

Metabolic dysfunction
Disrupted insulin / AMPK signalling reduces follicular energy supply.

â†’

Pro Fact Meta B — Cyclical Metabolic Reset

Metabolic dysfunction

Weight & adipose-tissue management → reduces BMI, suppresses appetite, limits carbohydrate-to-fat c...

AMPLIFIER

Chronic stress
HPA-axis activation accelerates anagen-to-telogen transition.

â†’

Inflammation Control

Chronic stress

Oxidative stress

Cytokine suppression → reduces follicular stress signals
Immune modulation → restores balanced immu...

AMPLIFIER

Oxidative stress
Sustained free-radical load damages follicle stem cells.

â†’

Inflammation Control

Chronic stress

Oxidative stress

Cytokine suppression → reduces follicular stress signals
Immune modulation → restores balanced immu...

TOPICAL PLAN

- F-Emugrow MCRD

Apply to the affected scalp area as directed by the doctor. Massage gently fo...
- F-Biwash+ Anti-Dandruff Shampoo

Use 2–3 times per week on wash days. Apply to wet scalp, lather gently for 3–...
- F-Trichosilk D&F (With Treatment)

Apply a small amount to damp or dry hair from mid-length to ends. Do not rins...
