TOPICAL & SCALP CARE PLAN

F-Emugrow MCRD
For pattern thinning and responsive scalp areas
Use: Apply once daily as prescribed. Massage gently. Do not rinse.

F-Biwash+ Anti-Dandruff Shampoo
For dandruff, itching and scalp hygiene
Use: Use 2–3 times weekly as advised; leave briefly before rinsing.

F-Trichosilk D&F (With Treatment)
For hair-shaft and scalp-care support
Use: Apply a small amount to hair lengths as advised. Do not rinse.

Minoxidil or prescription changes should be reconsidered only after scalp barrier and dandruff are controlled.

YOUR RECOVERY TIMELINE (DAY BASED)

1

Day 0–30
Calm the scalp and stabilise triggers
Reduction in active hair fall Improvement in scalp health and comfort. Consistency is the key early signal.

2

Day 30–60
Reduce shedding and rebuild support
Early signs of follicular recovery Improvement in hair caliber (thickness). Nutrition and topical rhythm continue.

3

Day 60–120
Early follicular recovery
Visible improvement in hair volume and density Reduced scalp show-through. Early signs may appear gradually.

4

Beyond Day 120
Visible improvement and consolidation
Further improvement in density and coverage Consolidation of improvement. Individual response varies.

LIFESTYLE & DAILY SUPPORT

WHAT SUPPORTS RECOVERY

- Metabolic dysfunction
- Chronic stress
- Iron-rich nutrition
- Adequate protein
- Hydration
- Consistent sleep
- Regular movement

WHAT MAY SLOW RECOVERY

- Smoking or vaping
- Untreated heavy bleeding
- Uncontrolled dandruff
- Extreme dieting
- Harsh chemical treatment
- Excessive heat styling
- Inconsistent treatment use
